

## Give me statistical report from this project

Here is a statistical report from the "Banking Overview Dashboard" project, presenting key account and transaction statistics extracted from the dashboard.<sup>[1]</sup>

### Account and Transaction Statistics

- The number of transactions by type shows 81 to 100 DEBIT transactions recorded.<sup>[1]</sup>
- The total sum of transaction amounts by account type reveals:
  - Savings accounts: approximately -94,000 units
  - Current accounts: approximately -99,000 units.<sup>[1]</sup>
- Account balances by type are visualized between -200,000 and 0 units, indicating overall negative balances in both major account types.<sup>[1]</sup>
- Distribution of account balances by name includes accounts ranging from nearly -10 million up to 0, emphasizing significant variance among customers.<sup>[1]</sup>

### Monthly and Yearly Trends

- The monthly transaction amounts fluctuate between -6,000 and -23,000 units, with particular lows visible in months like April and September.<sup>[1]</sup>
- Transaction counts by year show incremental growth from 20 in 2024 to 61 in 2025, highlighting increasing activity.<sup>[1]</sup>

### Customer Demographics

- Customers are segmented by age group and gender, with age groups 26-35 and 36-50 well represented and balanced gender distribution among major account holders.<sup>[1]</sup>
- The number of inactive accounts is tracked across months from February 2024 to January 2025, suggesting seasonality or shifts in user engagement.<sup>[1]</sup>

This statistical report illustrates overall negative balances, a steady increase in yearly transaction counts, and detailed demographic coverage for strategic banking analysis.<sup>[1]</sup>
